

CARDIAC SCIENCE

POWERHEART IS HELPING CREATE HEARTSAFE ENVIRONMENTS

AT THE HEART OF
SAVING LIVES™

HEARTSAFE PROGRAM MANAGEMENT

Cardiac Science offers a complete suite of Program Management products to meet your unique AED program needs. These products provide education, AED tracking, and management services to help your organization comply with varying federal and state regulatory requirements concerning AED placement and usage. Rely on Cardiac Science products for implementing and documenting your comprehensive AED program.

As the leader in Creating Heartsafe Environments, we offer:

EXPERIENCE With over 20,000 customers taking advantage of our QuickResponse® and TotalResponse® Program Management products and services, we have trained more than 300,000 people to be ready to use an AED when it matters most.

QUALITY OF TRAINING Cardiac Science employs its own educators, delivering both American Heart Association (AHA) and American Safety and Health Institute (ASHI) certified training. The result is consistent training methods incorporating the most up-to-date CPR/AED usage guidelines. No matter where you'd like to deploy an AED, our programs help ensure a trained individual will have the right skills to respond when every second counts.

EASE OF MANAGEMENT Utilizing the proprietary MasterTrak™ system as the platform for your AED program, Cardiac Science provides all the management tools necessary to make complicated deployments easy. MasterTrak stores facility contacts, training rosters, certification dates, employee training records and related test scores in a convenient, web-enabled location. All AED program equipment inventory, locations, serial numbers and expiration dates are recorded, and incident and post-event records are available upon request. MasterTrak E-minder automatically sends an e-mail reminder to your program manager to schedule training updates or order supplies as needed. If more personalized service is desired, Cardiac Science offers periodic visits by a trained Cardiac Science representative to personally inspect each AED in your inventory, giving you the peace-of-mind that your devices are RescueReady when you need them.

Rely on Cardiac Science to help you every step of the way. To learn more about Cardiac Science AED's and our Heartsafe Program Management Products and Services, please visit www.powerheart.com.

AED Deployment and Management

QuickResponse and TotalResponse Program Management Solutions

Cardiac Science QuickResponse AED/CPR Program Management

The QuickResponse product includes a comprehensive training and program management package that facilitates successful AED deployments. With both AHA and ASHI versions, this program includes AED/CPR training for up to 10 people at one location, medical authorization/prescription and direction, and our proprietary MasterTrak program management system.

Cardiac Science TotalResponse AED/CPR/First Aid/O2 Program Management

In addition to supplying all of the products and services included in the QuickResponse program, the TotalResponse system includes instruction in first aid and emergency oxygen administration.

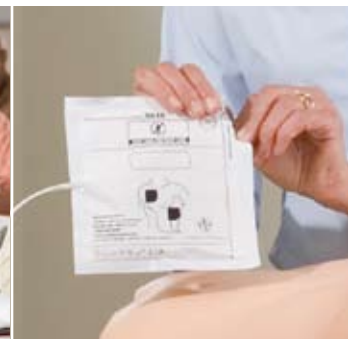

AED Service Plans

At regularly scheduled intervals, a trained Cardiac Science technician will inspect the AED at your site, conduct manufacturer recommended maintenance, and replace any disposables that have been used or have expired.

Additional Services

Cardiac Science is a leading provider of AED Program Management Services. We can work with your organization to develop a program tailored to your needs.

To start your Heartsafe Program, please contact one of our helpful representatives at (800) 991-5465.
